Saturday, November 21, 2026, from 8:30 AM to 6:00 PM
Auditorio central, Santa Cruz de la Sierra
Organized by Comunidad Dev de Ejemplo

180
people with a pass

142
checked in, verified on Stellar

79%
of pass holders showed up

The event in numbers

What happened at DevFest de la comunidad 2026, counted from the event record: each check-in and each redemption is recorded once per person.

180
Passes issued
out of 200 spots

142
Checked in
verified in the Stellar contract

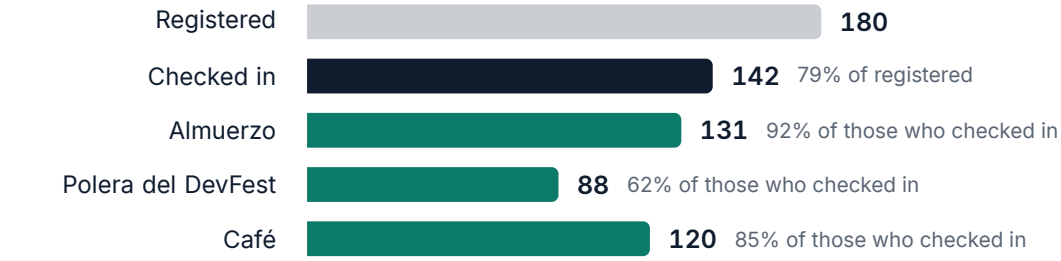

79%
Attendance rate
of passes issued

342
Redemptions
across 6 benefits; details below

3
Prizes delivered
out of 3 won in the draw

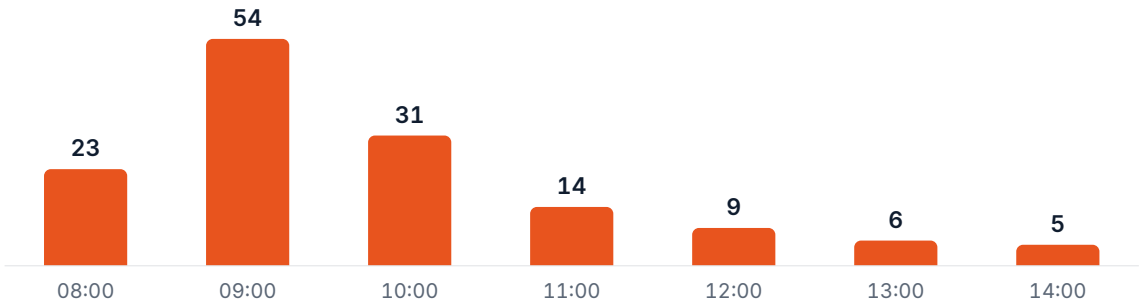

2
Duplicates caught
attempts to check in or redeem again, rejected

From registration to the table

Registered means passes issued. Each redemption counts once per person.

Arrivals, hour by hour

Check-ins per hour, in the event's local time. The busiest hour started at 09:00, with 54 people.

Verified attendance

For the Stellar Ambassador Program's Event Documentation Package: each qualifying event needs at least 20 verified attendees and 20 minutes of Stellar content.

Verified attendees

142

Meets the minimum of 20

The program asks for at least 20. Each attendee is a check-in recorded on Stellar.

Stellar content on the agenda

45 min

Meets the 20 minutes

Reported by the organizer, from the event agenda.

How it is verified

Each check-in is recorded by the event's gate account in the rumbo-pass contract on Stellar, once per person: if someone tries to check in again, the contract rejects it and the report counts it as a duplicate caught. The contract stores only each pass's account, never names or emails, and anyone can count its check-ins.

In a real report, the event contract goes here, with its stellar.expert link to count the check-ins.

A sample of the check-ins

No.	Transaction	On stellar.expert	Time

In a real report, the links to each check-in on Stellar go here.

This example shows no transactions: none of its check-ins exist.

Food and what was handed out

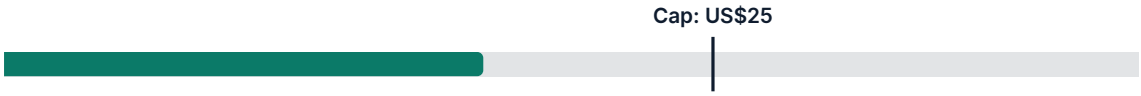

Each benefit, against those who registered and those who checked in.

Benefit	Granted to	Redeemed	Of registered	Of checked in
Almuerzo food	180	131	73%	92%
Polera del DevFest merch	120	88	49%	62%
Café other benefit	180	120	67%	85%
Draw prizes 3 prizes in the catalog	3	3	2%	2%

Food spend
US$2,400

Per person checked in
US$16.90

Program cap
US$25

Within the US$25 per person cap

The spend is reported by the organizer and divided by the 142 people who checked in.

For Cafetería La Brújula

What your sponsorship moved at DevFest de la comunidad 2026: the redemptions of your benefit and how many people it reached.

120
Café redeemed
85% of those who checked in

180
People registered
142 checked in

37
Contacts shared
people who agreed to hear from you

This report has no names or emails. The organizer sends you the contacts of those who agreed to share them, separately.

The draw

A verifiable draw among those who checked in.

142

People in the draw

everyone who checked in

3

Prizes

3 delivered

Auriculares	Delivered
Teclado mecánico	Delivered
Mochila de la comunidad	Delivered

How to check it

The result comes from a public random value fixed before the draw. With the proof, anyone can repeat the calculation and reach the same result.

In a real report, the link to the draw proof goes here.

How to verify this report

Anyone can open the event contract and its transactions on stellar.expert and count the check-ins, without asking Rumbo or the organizer for anything. This report contains no personal data: only aggregate numbers and the public identifiers of the contract and the transactions. In this example the contract and the transactions do not exist: the data is fictitious.

Data as of November 21, 2026 at 11:30 PM. Report generated by Rumbo on November 21, 2026.
